Specifically To Author Mark Pawson:

I have a special request of you. It is rather important to be the truth beacon in the HIV Communities, local region to region. The messaging on these matters have been derailed from the tracks. The ignorance that induces this derailment of commons needs a teleconference interface for the occurrence that happened within the local establishment reach of the Colorado Health Network aka Denver Colorado Aids Project.

Invited Special To Attend A Teleconference Meeting to discuss what is the aftermath effect of targeting the work project effort space of James Martin Driskill, an adult consent through and practices school, where community messaging was indeed already in efficiency output interactive listening. To the date of the collapse, I had established a trust and respect holding for 6 students + myself --- a total school learning and sharing priority collective of 7. We were really on course for greatness.

Sergeant Rogers, First Class? Second Class? Third Class? Ninth Class?

You are out of your league Sir!

I am the responsible and legal owner of one of the most unique cyber-identities to ever exist on this planet! I know I have it -- and I have it sound, secure, and with confidence devine, it is for a purpose not yet you see the reasoning -- to put this into empowerment magnified processing --- a trust ladder networking ideal. It is live online since 2005 --- and the technology specs use something way different than you have eve seen used before. You Sergeant Rogers have some extra homework to do, and it better be placed with a fire up high -- for Lions I am one and i will fuel that fire higher and higher --- I demand that you see the light at the end of this dark tunnel that establishment has caused --- the dark tunnel of perceptual blindness.

Resourceful I am --- and never shall it be said creepy or wrong.

As a paying member of TruthFinder, there are sections in each report.

In each of these sections is the opportunity to comment "custom" reasoning text onto the subject matter of a n actual background check data report.

I see that you are a III --- Go Glory --- I was getting a bit confused to the established mixing of name referencing.

Just in case your father does not bump into this matter by Google search outside of Truthfinder, the gem of the chat that holds dishonor onto this network is placed to him first.

This appears on each section --- members apply new meaning to cover-up -- no more --- no more lies --- no more cheats --- no more secrets --- this conspiracy terminates with written pledges and oaths to not engage in this outrageous destruction of trust ever imagined and actually undertaken.

Add a comment to the **Personal Information Section** of this report.

Within your ID coded report --- I have placed really profound writing onto the matters at hand. You never had the intention to satisfy my request --- to open and read the tweeter record between my account and yours. it is now a demand.

The comment as it is showing in this email --- has been submitted to your report. I don't exactly know how Truthfinder will handle it --- but I am going to put into the affairs of energy to explain this rally fully wisdom wide - - to bust your all brains to blurry bits.

It is to blow you mindset of a dastardly rut --- the practice and the habit has been your addiction. All addictions are the same.... drug chemical types are no more highly addictive and less controllable than any other form of involvement addictions. That be arcade games, food, shopping, wight training, and those horrid sets of numbers in my mom's carry.

You and your father by outside strong counsel are in a binding knot of reconciliation. Since you think you can just ignore the twitterverse of those tagged @SanBernardinoPD tweets that were written wit good faith effort to break a communication barrier known as an "Informational quarantine".

Attempt at customer support relations ticket closure -- this ticket cannot be closed until the termination agreement accord of a conspiracy you all have taken yourselves to new lowest of all low moral proclivity --- time for something new!

That makes me 54 years old. What is exactly happening here in a dimension of forced persecution factors that involve a systemic problem of government-sponsored hate that is embedded in at least my perspective into the rungs of a climb on your own ladder of detached social services support that does not actually service and function to provide foundational support system holding members of the HIV infected community above the ability haters class line to reach at and grab and kick me down and when I am low --- off my pathway of attempting working successful wellness and healthy wellness outcome in the pursuit of my inalienable rights of life, liberty and the pursuit of happiness --- [however I define such mechanics f life, dynamics of interpersonal friends, and how to separate oneself from the haters that are

given granted immunity to proceed to destroy the lives of those who they target. In the scheme I am in, that would be the ones they call the sinners of the dirty. They claim their moral superiority that they are the other side of righteous. In that equation, they deserve their space to do their God's truth --- and kill the gays --- the scheme that seems to always default to see the connection that the man, not the sergeant, dismisses the obvious presence of connections proving conspiracy exposed. The man is a prevaricator [one who does not have upfront and real honesty at the surface of his intentions and actions]. I don't have enough sharing time with him yet -- it may or may not mix into that presence of observed memetic patterns that I can then find the association of pattern that can determine if the man strides forward is leaving huge or tiny wakes session. Is he leaving crumbs of minor residue that hardly matter, or is it worse, the wake of discord, the actions he makes or directs of other are actually the actions that I see surfacing once more --- the actions of the Gangstalkers intention to destroy the man who has a solid mission of peace ---every last element of my ability is focused on exposing this conspiracy. In that, the federal law states that in the commission violation of legal offense, the crime being committed under anti-gang stalking legal definitions, human life is extinguished by the actions and behaviors of these gang stalkers, such gang stalking activity is escalated to the felony class of Murder! I made a statement that my intention is so strong with my mother to expose and terminate this hate conspiracy. What if I were to make a comparison commitment that success in a different goal --- My goal here in metaphor is to actually physically be placed on the moon. However that would be decisively planned, to get int the click of politic, or get close to and befriend a Nasa pal, or would I build a spacecraft from scratch, the science learning, books and reading all prerequisites to ---- the commitment I will be on the moon. I am going to break this hate conspiracy - it will be terminated. The commitment to this challenge -- however mindfully mapped away - will be charged to make my days filled up with a mission and a goal. I will use any means possible to this goal that does not break the barrier of consent [expressively or tacitly implied]. The Sergeant's silence in a Plato quote from a long time ago gives consent to proceed against the silence in any peaceful methods at my reach. i am very resourceful and quirky at times --- I am willing to break barriers --- just over the edge -- to the pushing and enabling an action that must be performed. Yes, if that action is legal one -- and they pursue to not act, I have I then on my own accord. Social Pursuits of attention and celebrity is absolutely not on my agenda at all. All I can say is to the end of my life, please people please, have some dignity of your own collective selves, please don't let me be the vision of horror, bloody bits or bloody spills, the bloody mess that rots continuously in the fucked-up human street. Any means necessary -- according to a recent article read --- reach over to external contacts and get them involved int your need of having a response of responsibility. On truthfinder, there is already a set of things of people close to this disorder of wartime always probable forever. Take yourself out of your simpleton view --- open and watch this video: Crazy World Future Words -A Writing Witt of Tacit consent -- When it is the Dysfunctional Silence Equation being used to generate millions of billions oblivion. That outcome here assumed to be at this point the intentioned endgame point of this person assigned to this Background Check Report Lanier Joseph Rogers. That is why this comment appears in the PERSONAL INFORMATION section. ----- Awesome Kramobone Glows and Blows Playroom : Denver Colorado : United States of America From his private meeting with President Obama to giving the first-ever papal address before a joint session of Congress, Pope Francis did not shy away from politics during his three-day stop in Washington, D.C. (Julie Percha/The Washington Post) An excerpt from his public address broadcast worldwide live to which this author here was watching and listening to him intently . He said to the world to what I agree has been a part of my missing portion of my mission work ideal - I have no fix for this and I cannot totally be in this community work alone. This is what he told or asked or advised us to do: ----- All of us are quite aware of, and deeply worried by, the disturbing social and political situation of the world today. Our world is increasingly a place of violent conflict, hatred and brutal atrocities, committed even in the name of God and of religion. We know that no religion is immune from forms of individual delusion or ideological extremism. This means that we must be especially attentive to every type of fundamentalism, whether religious or of any other kind. A delicate balance is required to combat violence perpetrated in the name of a religion, an ideology or an economic system, while also safeguarding religious freedom, intellectual freedom and individual freedoms. But there is another temptation which we must especially guard against: the simplistic reductionism which sees only good or evil; or, if you will, the righteous and sinners. The contemporary world, with its open wounds which affect so many of our brothers and sisters, demands that we confront every form of polarization which would divide it into these two camps. We know that in the attempt to be freed of the enemy without, we can be tempted to feed the enemy within. To imitate the hatred and violence of tyrants and murderers is the best way to take their place. That is something

which you, as a people, reject. Our response must instead be one of hope and healing, of peace and justice. We are asked to summon the courage and the intelligence to resolve today's many geopolitical and economic crises. Even in the developed world, the effects of unjust structures and actions are all too apparent. Our efforts must aim at restoring hope, righting wrongs, maintaining commitments, and thus promoting the well-being of individuals and of peoples. We must move forward together, as one, in a renewed spirit of fraternity and solidarity, cooperating generously for the common good. The challenges facing us today call for a renewal of that spirit of cooperation, which has accomplished so much good throughout the history of the United States. The complexity, the gravity and the urgency of these challenges demand that we pool our resources and talents, and resolve to support one another, with respect for our differences and our convictions of conscience. It's Just an Excuse to Slut Around: gay and bisexual men's constructions of HIV pre-exposure prophylaxis (PrEP) as a social problem

Sociology of Health and Illness, 2018

 Mark Pawson  Christian Grov

Since the 2012 FDA approval of HIV Pre-Exposure Prophylaxis (PrEP) as a method to prevent HIV, its uptake among gay and bisexual men has been met with conflict. Drawing on discussions of PrEP from focus groups with gay and bisexual men in New York City (N = 5 groups, n = 32 participants), we sought to make meaning of the moral debate surrounding the implementation of biomedical HIV prevention medications. Grounded in the constructionist perspective on social problems, this case study focus...

Conclusion

One of medical sociology's main tasks has been to emphasise the various ways health and illness are frequently impacted by political and cultural factors that further complicate biomedical conditions (Brown 1995, Conrad and Barker 2010). HIV has historically been an illness loaded with cultural meanings that have negatively impacted the ways we as a society are able to diagnose, treat, and prevent its spread (Brown 1995, Giami and Perrey 2012). A constructionist approach reminds us that how a problem is defined inevitably shapes the way we as a society respond to it (Conrad and Barker 2010). So, while the cultural meanings of stigmatised illness like HIV are significant, the cultural meanings attributed to particular forms of preventing illnesses like HIV are similarly significant. By studying the construction of PrEP as a social problem, we were able to highlight how gay and bisexual men define what they consider appropriate ways to prevent the spread of HIV. The micro level social problems work performed by gay and bisexual men

demonstrates the influence subcultural norms and values regarding sexual etiquette, sexual risk, and sexual responsibility have on perceptions of biomedical prevention efforts.

The conflicting constructions of PrEP covered in this manuscript offer a window into some of the most pressing cultural issues impacting HIV prevention efforts on a micro level among gay and bisexual men. As HIV prevention efforts are social interventions, future studies should focus on the ways advances in pharmaceutical technologies interact and potentially clash with cultural beliefs that construct symbolic boundaries between acceptable and unacceptable sexual health practices. In addition to advances in biomedical technologies, social action is required to combat the social and cultural factors that persistently thwart efforts aimed at gaining control over the HIV epidemic in the United States, particularly among high risk populations like gay and bisexual men.

As a means to achieve such ends, public health organisations that design and disseminate **HIV prevention messaging should strive to construct more inclusive definitions** of sexual health practices in ways that seek to combat the stigma currently **associated with those who make use of other prevention methods besides condoms**.
